Light Years: An Investigation into the Extraterrestrial Experiences of Eduard Meier (norwegian translation. link) Audiobook: By: Gary Kinder . In 1975, a Swiss Caretaker named Eduard "Billy" Meier disappeared on his motorbike into a forest near his village. He returned with several clear photographs of a large, silvery disk hovering in the sky.

### Light Years: An Investigation into the Extraterrestrial

light years pdf The speed of light in vacuum, commonly denoted  $c$ , is a universal physical constant important in many areas of physics. Its exact value is 299,792,458 metres per second (approximately 300,000 km/s (186,000 mi/s)). It is exact because by international agreement a metre is defined to be the length of the path travelled by light

Lesson 3 " Understanding Distance in Space (optional) Background The distance between objects in space is vast and very difficult for most children to grasp. The values for these distances are cumbersome for astronomers and scientists to manipulate. Therefore, scientists use a unit of measurement called an astronomical unit.

Parsecs. The parsec is a unit of length equivalent to around 20 trillion (20,000,000,000,000) miles, 31 trillion kilometres, or 206,264 times the distance from the earth to the sun. A parsec is also equivalent to approximately 3.26 light years (the journey distance if you travelled at the speed of light for three years and three months).

### **Astronomy - Purdue University**

A light-year is a unit of distance. It measures how far light travels through space in one year. 12. The distance that a star so far away would appear to move when seen from opposite sides of Earthâ€™s orbit would be too small to measure accurately. 13. A star is born when nuclear fusion begins. 14. Most star formation takes place in the
