On 25 April 1953 the proposed double helical structure of DNA was first published in Nature and thereafter referred to as the Watson-Crick model, so-named after the two authors. At the time many thought protein was the genetic material and not DNA and there was reluctance among some scientists to ...

Watson and DNA: Making a Scientific Revolution

Watson and DNA is overly influenced by Watson's own egomania, attributing a scientific revolution to him alone when, in reality, many people and many institutions were involved. Though this is a well-written book, historians of science will find nothing new in it concerning the discovery of the double helical structure of DNA.

about the DNA molecule, including its primary chemical components and the ways in which they joined with one another. Without the scientific foundation provided by these pioneers, Watson and Crick may never have reached their groundbreaking conclusion of 1953: that the DNA molecule exists in the form of a three-dimensional double helix.
