A smart city is an urban area that uses different types of electronic data collection sensors to supply information which is used to manage assets and resources efficiently. This includes data collected from citizens, devices, and assets that is processed and analyzed to monitor and manage traffic and transportation systems, power plants, water supply networks, waste management, law ...

Smart city - Wikipedia

MOST is UNESCO's intergovernmental science programme on social transformations. MOST works with governments, social and human science communities and civil societies to improve connections between knowledge and action, connections that are one key to positive social change.

Management of Social Transformations (MOST) Programme

Urbanization refers to the population shift from rural to urban residency, the gradual increase in the proportion of people living in urban areas, and the ways in which each society adapts to this change. It is predominantly the process by which towns and cities are formed and become larger as more people begin living and working in central areas. ...

Building evidence for strengthening and transforming health and social delivery systems to maximize equity, functional ability, autonomy, and dignity of ageing populations

WHO Kobe

The world is moving to cities, fast and for the long term. In a cognitive era, cities themselves are moving: evolving, ever-changing, not fixed on a marked destination. We are at an important point in that evolution, as new forces emerge and combine to create new ways for cities to work. Social ...
