The Collins class of six Australian-built diesel-electric submarines is operated by the Royal Australian Navy (RAN). The Collins class takes its name from Australian Vice Admiral John Augustine Collins; all six submarines are named after significant RAN personnel who distinguished themselves in action during World War II. The boats were the first submarines to be constructed in Australia ...

Abstract: The impact that high concentrations of ice particles at cruise altitudes have on jet engines will be described, looking at the physical phenomena that lead to ice accretion and engine damage. The contrast with icing associated with supercooled water is emphasised. A brief history of the ice crystal problem is discussed and what options there are for the future.
