Display problems could have a number of causes. The following workarounds only apply to 10.1.2. They apply in cases where PDF display fails because the product can't determine the length of the PDF file based on information contained in the HTTP header. Possible workarounds include: For zipped files, remove accept-ranges from the HTTP header. This method should have zero effect on any site or site traffic.

Abstract. During a short period of the year, Daphnia may perform a phenotypically induced diel vertical migration. For this to happen, light-induced swimming reactions must be enhanced both at dawn and at dusk. Enhanced swimming in response to light intensity increase can be elicited by fish-associated kairomone in the laboratory, if food is sufficiently available.
