Reductionism is any of several related philosophical ideas regarding the associations between phenomena which can be described in terms of other simpler or more fundamental phenomena.. The Oxford Companion to Philosophy suggests that reductionism is "one of the most used and abused terms in the philosophical lexicon" and suggests a three part division:

Reductionism - Wikipedia

Randomness is the lack of pattern or predictability in events. A random sequence of events, symbols or steps has no order and does not follow an intelligible pattern or combination. Individual random events are by definition unpredictable, but in many cases the frequency of different outcomes over a large number of events (or "trials") is predictable.

Randomness - Wikipedia

Preface. This is the preprint of an invited Deep Learning (DL) overview. One of its goals is to assign credit to those who contributed to the present state of the art. I acknowledge the limitations of attempting to achieve this goal.

Deep learning in neural networks: An overview - ScienceDirect

Abstract. This paper surveys deep learning in neural networks, which has recently achieved state-of-the-art performance in many pattern recognition tasks. The survey covers the basic concepts, architectures, and applications of deep learning. It also discusses the challenges and future directions of this research area.
