OpenVPN is a free and open-source software application that implements virtual private network (VPN) techniques to create secure point-to-point or site-to-site connections in routed or bridged configurations and remote access facilities. It uses a custom security protocol that utilizes SSL/TLS for key exchange. It is capable of traversing network address translators (NATs) and firewalls.

InformationWeek, serving the information needs of the

œ Innovation•: creativity; novelty; the process of devising a new idea or thing, or improving an existing idea or thing. Although the word carries a positive connotation in American culture, innovation, like all human activities, has costs as well as benefits. These costs and benefits have preoccupied economists, political philosophers, and artists for centuries.
