Automotive Adaptive Front-lighting System Reference Design

Architectural lighting design is a field within architecture, interior design and electrical engineering that is concerned with the design of lighting systems, including natural light, electric light, or both, to serve human needs.. The design process takes account of: The kind of human activity for which lighting is to be provided; The amount of light required

Architectural lighting design - Wikipedia

Performance-Based Building Design is an approach to the design of any complexity of building, from single-detached homes up to and including high-rise apartments and office buildings. A building constructed in this way is required to meet certain measurable or predictable performance requirements, such as energy efficiency or seismic load, without a specific prescribed method by which to ...
